Summary

Senior Software Engineer with **5 years of experience** leading development of scalable SaaS and **AI-driven** platforms from concept to production. Skilled across the full stack with Node.js, Django, React, and AWS, and recently focused on **LLMs** and **agent-based automation** to bring intelligence into real-world products. Known for combining technical leadership with a strong product mindset, delivering reliable, user-centered systems that balance performance, maintainability, and innovation.

Experience

Mynd

Senior Full Stack Engineer

Canada (Remote)

Sept 2023 - Present

- Led the development of a **practice management platform** powering operations for over 200 **therapists**, unifying scheduling, billing, and clinical documentation in one seamless system.
- Designed the end-to-end architecture with **Node.js (TypeScript)**, **Django**, and **AWS Lambda**, delivering a low-latency, event-driven backend capable of handling thousands of concurrent sessions.
- Built an AI-powered note-taking and automation system using GPT, Gemini, and LangChain.
- Pioneered LLM-driven automation, using **LangChain** and **Inngest** to build multi-agent systems that analyze conversations, generate insights, and intelligent workflow.
- Delivered a modern, accessible front-end using **React**, **Chakra UI**, and **Tailwind CSS**, enhancing onboarding flow and therapist productivity metrics.
- Integrated real-time communication through **LiveKit**, **AWS Chime**, and **Deepgram**, enabling secure video calls, live transcription, and chat across therapy sessions.

Extendly

Full Stack Developer

Canada (Remote)

Apr 2023 - May 2024

- Built a **RAG-powered chatbot** for contextual customer support using Open AI, Fast API, and PostgreSQL, improving response accuracy and reducing manual support load.
- Designed and developed responsive, cross-platform interfaces with React, delivering a smooth experience across devices.
- Integrated third-party APIs into **SaaS workflows** using AWS Lambda and a serverless architecture, enabling automation and data sync across platforms.

Zaytrics Pvt Ltd

Full Stack Developer

Islamabad, Pakistan

Sep 2020 - Apr 2023

- Created ML-based system for detecting **trademark infringement in logos** with 85%+ accuracy, reducing manual review by 70%
- Built multiple apps with Node.js, React, Flask, and PostgreSQL, delivering tools for **legal and marketing automation**
- Refactored PostgreSQL and MongoDB databases to boost query speed and scalability under increasing data loads

KEY PROJECTS

Mynd

<https://mynd.app>

AI-powered practice management platform for therapists, offering video sessions, automated note-taking, rag based chat system, scheduling, billing, and secure client communication.

Medimap

<https://medimap.ca/>

A healthcare platform that helps patients find nearby walk-in clinics, urgent care centers, and other healthcare providers in real time..

KindlMedia

<https://kb.mycrmsupport.com/kindlmedia1>

Developed a custom chat system to support real-time communication between clients and businesses.

SKILLS

Programming Languages:	TypeScript, Python, JavaScript
Frameworks & Libraries:	Node JS, Django, Flask, React, Vue, FastAPI, Fastify
Databases:	MySQL, PostgreSQL, MongoDB, DynamoDB, Elastic Search
Cloud:	AWS, GCP
AI & Automation	GPT, Gemini, LLM agents, Inngest, vector search, RAG

EDUCATION

Air University

BS Compute Science

Islamabad, Pakistan

Sep 2017 - Jun 2021
