Senior software engineer with 5+ years across production SaaS and AI systems. Currently building **Kindred Workplace** and shipping agent-based developer tooling across Kindred (Sentry / Gleap → PR via Goose, a universal in-app agent serving 1,000+ users). Operate as an AI-native engineer with **Claude Code**, **Cursor**, and **Goose** as core daily tools. Background in Node.js, Django, React, AWS.

## EXPERIENCE

**Kindred** (formerly Mynd) Sept 2023 – Present · Remote

Senior Full-Stack Engineer

TypeScript · Node.js · Django · AWS Lambda · React · LangChain · Goose · Inngest · LiveKit · Deepgram

Currently shipping **Kindred Workplace**, an emotional-intelligence platform for teams. Own product engineering across React, Node.js (TypeScript), and Django, including embedded AI features.

Built **Kindred Practice (formerly Mynd)**, an AI-driven practice management platform for therapists. Scaled to 1,000+ users. Owned scheduling, billing, clinical documentation, and AI features end-to-end.

Shipped **developer-loop automations** across the engineering org. Sentry incidents and Gleap support tickets route through **Goose** agents that reproduce, implement, and open ready-to-review pull requests, cutting incident-to-fix time substantially.

Built a **universal in-app AI agent** capable of executing arbitrary product actions through tool calls, with structured outputs, scoped permissions, and per-call guardrails.

Deployed multiple **production RAG pipelines** across clinical context, customer support, and internal knowledge surfaces. Pgvector storage, custom chunking strategies, eval-driven iteration.

Treat AI as core engineering infrastructure: authored team-wide **Cursor rules** and **Claude Code** skills encoding Kindred's codebase conventions, sustaining ~2–3× shipping velocity on new features and cutting new-hire ramp from weeks to days.

Designed event-driven backend on Node.js (TypeScript), Django, and AWS Lambda. Integrated real-time video, transcription, and chat via LiveKit, AWS Chime, and Deepgram.

**Extendly** Apr 2023 – May 2024 · Remote

Full-Stack Developer

Python · OpenAI · FastAPI · PostgreSQL · React · AWS Lambda

Built a **RAG-powered customer support chatbot** on OpenAI, FastAPI, and PostgreSQL. Improved response accuracy and significantly reduced manual support load.

Designed and shipped cross-platform React interfaces for the SaaS product.

Integrated third-party APIs into SaaS workflows on AWS Lambda using a serverless architecture, enabling automation and data sync across platforms.

**Zaytrics Pvt Ltd** Sep 2020 – Apr 2023 · Islamabad

Full-Stack Developer

Node.js · React · Flask · PostgreSQL · MongoDB · TensorFlow

Built an **ML-based trademark infringement detection** system on logos. Reached 85%+ accuracy. Reduced manual review effort by ~70%.

Delivered multiple applications across Node.js, React, Flask, and PostgreSQL for legal and marketing automation.

Refactored PostgreSQL and MongoDB databases. Improved query performance and scalability under growing data loads.

SELECTED PROJECTS

Kindred Workplace · kindredworkplace.com

Emotional-intelligence platform for teams. Full-stack delivery, real-time features, and embedded AI.

Kindred Practice · kindredpractice.com (formerly mynd.app)

AI-powered practice management platform for therapists. Video, automated note-taking, RAG-based chat, scheduling, billing.

Developer-Loop Automations · internal · Goose-based agents

Sentry incidents and Gleap tickets routed to Goose agents that scope, implement, and open pull requests.

Medimap · medimap.ca

Healthcare platform helping patients find nearby walk-in clinics and providers in real time.

SKILLS

Languages · TypeScript, Python, JavaScript

Backend · Node.js, Django, FastAPI, Flask, Fastify

Frontend · React, Vue, Tailwind CSS, Chakra UI

Data · PostgreSQL, MongoDB, DynamoDB, Elasticsearch, pgvector

Cloud · AWS (Lambda, Chime), GCP

AI stack · Claude Code, Cursor, Goose, MCP, LangChain, Inngest, GPT, Gemini, RAG, vector search, evals, Deepgram, LiveKit

EDUCATION

BS Computer Science, Air University, Islamabad, Pakistan

Sep 2017 – Jun 2021
